QUALITY POLICY

FAST Aerospace, operating in the aerospace industry, regards quality, technical reliability, and customer satisfaction as fundamental strategic elements for the company's success and development.

To this end, Management has implemented and maintains a Quality Management System in accordance with UNI EN ISO 9001, establishing the following commitments and strategic guidelines:

- **Customer Focus and Satisfaction**: Understand and consistently meet applicable statutory, regulatory, contractual, and technical customer requirements, while continually striving to enhance customer satisfaction.
- **Context and Strategy**: Ensure that this Policy is consistent with the aerospace context in which the company operates and supports its growth and innovation strategies.
- **Continual Improvement**: Implement, maintain, and improve the effectiveness of the Quality Management System through the process approach and the analysis of risks and opportunities (risk-based thinking).
- **Personnel Competence and Engagement**: Promote professional development, ongoing training, and the engagement of all personnel, ensuring suitable, safe, and stimulating work environments.
- **Supplier Partnerships**: Monitor and collaborate with suppliers and external partners to ensure high quality standards throughout the supply chain.
- **Regulatory Compliance and Sustainability**: Operate in compliance with all applicable regulations, protecting workers' health and safety and respecting the environment in the workplace.

This Policy provides the framework for establishing and periodically reviewing Strategic Objectives, which are defined and monitored during Management Review.

Management ensures that this Policy is communicated, understood, and applied at all levels of the organization and made available to relevant interested parties.
